PROFILE

Software Engineer with 1+ year of hands-on experience building scalable full-stack applications and RESTful APIs using **TypeScript, React.js, Next.js, Node.js, NestJS, and MongoDB**. Proven track record shipping production-grade SaaS platforms, from enterprise CRMs to AI-powered tools integrating **Python, LLMs, and OCR pipelines**. Passionate about leveraging AI to build intelligent, real-world solutions.

EXPERIENCE

Software Engineer

Octopi Digital LLC

January 2026- Present

Gulshan-1, Dhaka 📍

- **Own end-to-end backend development** for enterprise SaaS platforms, from API design to production deployment, building secure, multi-user systems with **authentication, RBAC**, and complex business logic
- Built **document intelligence features** from scratch, including an **OCR pipeline** and **AI/LLM integration** to automate analysis of PDFs, images, and DOCX files, my first hands-on production experience combining AI with backend engineering.
- Designed **real-time features** (**WebSocket**-based notifications, collaborative workflows) and optimized **MongoDB/SQL Server** databases, learning firsthand how architecture choices affect performance at scale.
- Contribute across the stack on **Next.js/React** frontend work when needed, giving me a full-picture view of how backend decisions impact the product.
- Manage deployment and reliability of production services on **Linux**, gaining practical DevOps experience beyond just writing code.
- Work closely with cross-functional teams through the full dev lifecycle, including **code reviews, testing, debugging**, sharpening how I collaborate and ship under real deadlines.

PROJECTS

OPSR0I CRM

Production - Live 📍

A **multi-tenant CRM platform** built for tree service businesses, handling everything from client management to job scheduling and payments. Architected as a full-stack SaaS product from the ground up, with real-time collaboration and enterprise-grade security baked in.

- Designed, developed, and maintained a **multi-tenant full-stack SaaS web application** with **6-role RBAC, JWT/Google OAuth authentication**, and real-time updates using **Socket io**.
- Built a **visual workflow automation system** with drag-and-drop triggers, automated email/SMS campaigns, and scheduled jobs using **Node-cron**.
- Integrated third-party services including **Stripe, Twilio, Google Calendar, Zoom, and Vapi AI** to streamline communication, payments, and scheduling, ensuring application **security and reliability**.
- Developed a **client portal and admin dashboard** for job tracking, e-signatures, payments, and analytics using **React 19, Redux Toolkit, and Recharts**.

NuPath AI

Production - Live 📍

An **AI-powered mental health platform** designed to deliver personalized wellness support at scale. Built the admin and organization management layer that powers the platform behind the scenes, including AI recommendation configuration and voice-based interactions.

- Developed the **Admin Dashboard and Organization Management** modules for a production **SaaS AI web application** using modern full-stack technologies.
- Designed and implemented secure backend **APIs**, role-based administration, and organization management workflows.
- Built a **configurable prompt management system** to support AI-powered recommendations.
- Integrated **Voice AI** capabilities to enhance conversational user experiences.

Octopi Digital Limited

Production - Live 📍

A full-stack **HR and Employee Management System** built for internal company use, covering everything from attendance to secure credential handling. Designed to replace manual HR processes with automated, real-time workflows across 20+ enterprise modules.

- Developed a full-stack **HR & Employee Management web application** using **React 18, Redux Toolkit, Node.js/Express, and MongoDB**, with 20+ modules.
- Implemented real-time notifications (**Socket io**) and automated workflows (**Node-cron**) for attendance, reminders, and scheduled tasks.
- Built **JWT-based authentication** and feature-level **RBAC**, with secure verification workflows and encrypted credential management, ensuring application **security**.
- Integrated **PDF/Excel report generation, QR code, Cloudinary, and Dropbox** to enhance workflow automation.

Document Compliance Network

Production - Live

A backend system built to extract and validate structured data from unstructured documents at scale. Focused on clean, modular architecture to support reliable document processing pipelines in production.

- Designed and developed scalable backend web systems using **FastAPI (Python)** with clean, modular, maintainable architecture.
- Built and tested **RESTful APIs** and backend modules for document processing, workflow automation, and validation.
- Developed document ingestion pipelines (**PDF, image, DOCX**), troubleshooting and optimizing database schemas and backend logic.
- Deployed and optimized production backend services, improving performance, scalability, and maintainability.

SKILLS

Programming Languages JavaScript (ES6+), Python, TypeScript, SQL	Frontend Development React.js, Next.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3	Backend Development Node.js, Express.js, NestJS, FastAPI, REST APIs, WebSocket (socket io), JWT Authentication, Google OAuth
Databases MongoDB, MySQL, MS SQL Server, PostgreSQL, Redis	AI & Machine Learning LangChain, LangGraph, CrewAI, RAG, OpenAI API, Prompt Engineering, LLM Integration, Ollama, ChromaDB	DevOps & Cloud Docker, Git, GitHub, Linux Server Administration (SSH, config), Nginx, CI/CD, Model Deployment, Agile/Scrum, Cloud Platforms (AWS/GCP/Azure)
Automation & Integrations n8n, Zapier, Make, Stripe, Twilio, Google Calendar API, Cloudinary	Computer Vision PyTorch, TensorFlow, OpenCV, Scikit-learn, YOLOv8, NumPy, Pandas	

EDUCATION

B.Sc in Computer Science and Engineering National Institute of Textile Engineering & Research	02/2022 – 07/2026 Nayarhat, Savar
Higher Secondary Certificate Monipur High School and Collage	2018 – 2020 Rupnagar, Dhaka

Courses

Full Stack Web Design & Development Nebulas IT • Gained hands-on experience developing and maintaining production-ready full-stack web applications using React.js, Next.js, Node.js, Express.js, MongoDB, and REST APIs, with clean and maintainable code practices. • Skilled in authentication, role-based access control (RBAC), database design, API integration, Git version control, and responsive web application development.
Data Science and Machine Learning with Python OSTAD • Proficient in Python and Scikit-learn, conducting model training and evaluation for regression, classification, and clustering tasks, applying strong analytical and problem-solving skills. • Skilled in developing and fine-tuning supervised/unsupervised models, including Random Forest and SVM.

Activities & Leadership

Executive Director of Web Design & Development NITER Computer Club • Conducted web design and development sessions • Organized technical events, competitions, and podcasts to strengthen the club's tech community and mentored club members on real world project development.	01/2024 – 01/2025 Savar, Dhaka
